EDUCATION

Προσθέστε ξεχωριστές ενότητες για κάθε τίτλο σπουδών, ξεκινώντας από τον πιο πρόσφατο.

09/2017 - 07/2022 Bachelor degree in Biomolecular Sciences and Biotechnology, in the Biology department of the University of Crete, Greece.

RESEARCH/WORKING EXPERIENCE

Προσθέστε την ερευνητική/επαγγελματική εμπειρία, ξεκινώντας από την πιο πρόσφατη.

05/2021- 10/2021 I completed my thesis in the faculty of medicine (University of Crete, Greece), in the laboratory of Clinical Microbiology and Microbial Pathogenesis of Dr. Georgios Chamilos, under the supervision of the postdoc Antonia Akoumianaki.

My thesis was about quantification of killing of *Aspergillus nidulans* spores by BMDMs (Bone marrow derived macrophages) of healthy and CGD (Chronic granulomatous disease) mice, by the CFUs technique, and the quantification of LC3 protein accumulation in the membrane of their phagosomes by immunofluorescence. The aim of the above project was the comparison of CGD and healthy macrophages in terms of LAP pathway function and the ability to kill *Aspergillus nidulans* spores.
